DETAILED ACTION

Drawings

The drawings are objected to because, as understood, the drain of 122 of Fig. 6 should be shown as an output rather than ground. Appropriate correction is required. Note, Applicant may no longer request that any objection to the drawing(s) be held in abeyance. See 37 C.F.R. § 1.85(a).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 19, lines 7-14, it is not understood how the circuit can have the recited operation when there has been no recitation of the connections of the subtractors to the gate and drain of the "first PMOS transistors".

Claim 23 is rejected for similar reasons as claim 22. Also, in lines 7-8, "a voltage circuit" has already been recited in line 5. It appears that "a voltage circuit" in lines 7-8 should be changed to --said voltage circuit-- or --a second voltage circuit--.

Claims 22 and 23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
